INCURABLE.

That is What the Books Say of Chronic Kidney Disease, But the New Fulton Compounds Have a Record of 87% of Recoveries Among Chronic Cases Incurable by All Other Medicines.

Druggists know that hidney disease that has brug on eight or ten months has become chronic and that it is then regarded by physicians as incurable and that up to the advent of the Putton Compounds that nothing on their shelves would touch it. It is a groven fact that nearly nine-tenths of all cases are now corable, and druggists themselves are taking the new Com-pounds. One of the recoveries was Dr. Zelis himself, the pioneer druggist of 522 Pacific street, San Prancisco, and he gave it to over a duran others who recovered. Here is another interesting recovers. As the nurse went out I beckoned her to come to me and asked an explanation. She told me that Clifford was a trifle flighty and had mistaken her for some one at home. Thinking that the arrival of the real Jenny-for as soon as Clifford came to himself the illusion would be gone—might save the boys life, we concluded to send a message to that effect to his people. The nurse found letters in his pockets giving the desired address, and the message was sent. Clifford when not delirious treated the nurse as a stranger, but when delirious as "Jenny." Meanwhile he was losing strength daily.
